-

Step 1: Pre-Launch Checklist

Before spending a single rupee on ads, make sure these are in place:

- [] **Website is working** — All product pages load, images are clear, prices are visible

- [] **Payment gateway is live** — UPI, cards, COD (Cash on Delivery is critical for India)
 - [] **Shipping policy is clear** — Delivery timelines, charges, and free-shipping thresholds
 - [] **Return policy exists** — Even a simple 7-day return policy builds trust
 - [] **Product images are high quality** — At least 3 images per product (on model, flat lay, detail)
 - [] **Product descriptions are complete** — Size, material, care instructions, fit guide
 - [] **Trust signals are present** — Reviews, ratings, secure payment badges, "100% genuine" messaging
 - [] **Meta Pixel installed** — Go to Meta Business Suite → Events Manager → Set up Pixel on your site
 - [] **Google Analytics 4 (GA4) installed** — Track visitors, add-to-carts, and purchases
 - [] **WhatsApp button added** — Indian customers prefer WhatsApp for queries
-

Step 2: Calculate Your Breakeven ROAS

You must know your breakeven ROAS before running ads. This tells you the **minimum return** you need to not lose money.

Formula

$$\text{Breakeven ROAS} = 1 \div \text{Profit Margin \%}$$

Calculate for Threadz

Fill in your numbers:

Metric	Your Number	Example
Average Selling Price (ASP)	₹_____	₹800
Cost of Goods (COGS)	₹_____	₹350
Shipping Cost per Order	₹_____	₹60
Payment Gateway Fee (~2%)	₹_____	₹16
Profit per Order	₹_____	₹374
Profit Margin %	____%	46.7%
Breakeven ROAS	____x	2.14x

Target ROAS

Your **target ROAS should be 1.5× your breakeven** to account for returns, refunds, and overhead:

If Breakeven ROAS = 2.14x
→ Target ROAS = 2.14 × 1.5 = 3.2x (round to 3x)

For fashion/apparel in India, aim for 3-5x ROAS.

Step 3: Select Hero Products to Advertise

With a small budget, **do NOT advertise your entire catalog**. Pick 1–3 hero products.

Product Selection Criteria for Threadzu

Factor	Best for Ads 	Avoid for Ads 
Price	₹500-₹2,000 range	Below ₹200 (margins too thin)
Margin	>40% gross margin	<25% margin
Visual appeal	Looks great on a model	Hard to photograph
Reviews	Has 5+ positive reviews	Zero reviews
Uniqueness	Distinctive designs	Generic commodity items
Impulse buy	Easy "yes" purchase	Needs long deliberation

Your Hero Product Selection

Pick your top 1-3 products and fill in:

#	Product Name	Price	Margin	Why It's a Hero
1	_____	₹_____	____%	Best seller / most unique
2	_____	₹_____	____%	High margin / great photos
3	_____	₹_____	____%	Trending / seasonal demand

Hero Product Strategy

1. **Pick 1 hero product** — your highest margin + best-looking + best-reviewed item
 2. **Create a compelling offer** — "Free shipping on orders above ₹499" or "Buy 2, Get 10% off"
 3. **Drive ALL ad traffic to that product page** — not your homepage
 4. **Use other products for retargeting** — show browsing visitors your wider catalog
-

Step 4: Choose Your Ad Platform

Recommendation for Threadzu: Start with Meta Ads (Instagram + Facebook)

Why Meta is best for a fashion/apparel store:

- ☒ Instagram is where fashion buyers discover brands
- ☒ Visual ad formats (Reels, carousel, Stories) showcase clothing perfectly
- ☒ Lowest minimum budget (₹200/day)
- ☒ Advantage+ Shopping campaigns handle targeting automatically
- ☒ Huge fashion-interested audience in India

Platform Decision Tree

Threadzu.in – Fashion / Apparel

- ├─ Products are visually appealing? → YES ☒
- ├─ Target audience is on Instagram? → YES ☒ (18-35 age group)
- ├─ Budget is small? → YES ☒
- └─ DECISION → Start with Meta (Instagram + Facebook)

When to Add Google Shopping (Later)

Add Google Shopping only when: - Monthly budget exceeds ₹10,000 - You've set up Google Merchant Center - People are searching for your product type ("buy cotton kurta online")

Step 5: Set Up Your Campaign

Meta Ads Campaign Structure for Threadzu

Threadzu Ad Account

- Campaign 1: Sales – Hero Product (Prospecting)

- Ad Set: Broad Targeting

- Ad 1: Hero product on model (lifestyle photo)

- Ad 2: Product flat-lay with offer text overlay

- Ad 3: 15-sec Reel (styling/unboxing video)

- Campaign 2: Sales – Retargeting (Start in Week 2)

- Ad Set: Website Visitors (last 7-14 days)

- Ad 1: Carousel of bestsellers

- Ad 2: "Still thinking about it?" with hero product + discount

Targeting Setup

For Prospecting (new customers):

Setting	Value
Location	India (or your delivery zones)
Age	18–35 (adjust based on your data)
Gender	Based on your product line
Interests	Start BROAD — let Meta's algorithm find buyers
Placement	Automatic (Instagram Reels + Feed + Stories + Facebook)
Conversion Event	Purchase (or Add to Cart if you have very little data)

Important: At small budgets, **do NOT over-target**. Keep it broad and let Meta's AI optimize.

Step 6: Budget Allocation

Micro Budget: ₹5,000/month

Campaign	Daily Budget	Monthly	Purpose
Prospecting	₹130/day	₹3,900	Find new customers
Retargeting	₹35/day	₹1,100	Convert visitors
Total	₹165/day	₹5,000	

Small Budget: ₹10,000/month

Campaign	Daily Budget	Monthly	Purpose
Prospecting	₹250/day	₹7,500	Find new customers
Retargeting	₹85/day	₹2,500	Convert visitors
Total	₹335/day	₹10,000	

Budget Rules

- **Week 1:** Put 100% into prospecting (you need pixel data first)
 - **Week 2 onward:** Split 75% prospecting / 25% retargeting
 - **Never change budget by more than 20%** at a time
 - **Minimum ₹200/day** for Meta to have enough data to optimize
-

Step 7: Create Ad Creatives

Ad Creative Checklist for Fashion/Apparel

Photo Ads (minimum 3 variations)

- [] **Lifestyle shot** — Product on a model in a real-world setting
- [] **Product shot** — Clean, well-lit product image with offer text overlay
- [] **Carousel** — Multiple products or multiple angles of hero product

Video/Reels Ads (highest performing for fashion)

- [] **Styling Reel** — 15 seconds showing how to style the product
- [] **Unboxing Reel** — Packaging reveal + product close-up
- [] **Before/After or Transformation** — Shows the product's impact

Ad Copy Templates for Threadzu

Template 1 — Lifestyle

Headline: Your Next Favorite [Product Type] 🧵
Primary Text: Designed for [audience]. Made with [material/quality].
Shop now at Threadzu — Free shipping on orders above ₹499.
CTA: Shop Now

Template 2 — Offer-Focused

Headline: [Product Name] — Now ₹[Price]
Primary Text: 🔥 Limited time: Buy 2, save 10%.
Premium quality. Easy returns. COD available.
CTA: Shop Now

Template 3 — Social Proof

Headline: [X]+ Happy Customers Love This
Primary Text: "Best quality I've found online" — ★★★★★
See why [Product] is Threadzu's #1 bestseller.
CTA: Shop Now

Creative Best Practices

1. **Show the product in the first 3 seconds** of any video
 2. **Include the price** if it's competitive
 3. **UGC (User Generated Content) style** beats polished studio content at small budgets
 4. **Use Indian context** — festivals, seasons, local styling cues
 5. **Always include a CTA** — "Shop Now" or "Order Today"
-

Step 8: Week-by-Week Action Plan

Week 1: Setup & Launch

- [] Install Meta Pixel on threadzu.in
- [] Set up Google Analytics 4
- [] Pick your 1–3 hero products
- [] Calculate your breakeven ROAS (use the table in Step 2)
- [] Create 3 ad creatives (2 images + 1 video/Reel)
- [] Set up Meta Ads Manager account
- [] Create Campaign 1: Prospecting (broad targeting)
- [] Launch ads — **put 100% budget into prospecting**
- [] Check results daily, but **do NOT change anything for 5 days**

Week 2: First Optimization

- [] Review performance: CTR, CPC, Add-to-Carts, Purchases
- [] Turn off any ad with CTR < 0.8%
- [] Increase budget 20% on the best-performing ad
- [] **Start Campaign 2: Retargeting** (website visitors, last 7–14 days)
- [] Check: Are people clicking but not buying? → Fix product page
- [] Check: Is add-to-cart rate low? → Improve offer or product images

Week 3: Double Down on Winners

- [] Identify your winning ad creative and audience
- [] Create 2 new ad variations based on the winning style
- [] Test a new hero product if the first one isn't converting
- [] Review ROAS — is it meeting your target?
- [] Add a carousel ad showing top 4–5 products

Week 4: Scale & Review

- [] If ROAS $\geq$ target: Increase budget by 20–30%
- [] If ROAS < target: Review the Optimization Playbook (Step 9)
- [] Set up abandoned cart email or WhatsApp message
- [] Plan Month 2 strategy based on what you've learned

Month 2+: Growth Phase

- [] Test Google Shopping (if budget allows)
 - [] Start influencer barter collaborations
 - [] Build email list with popup offer
 - [] Create seasonal/festival campaign calendar
 - [] Expand to 3-5 hero products based on ad data
-

Step 9: Optimization Playbook

Use this decision tree whenever ROAS is below target:

Problem → Diagnosis → Fix

Getting clicks but no sales? - → Check product page: Is it clear? Are images good? Is the price visible? - → Check checkout: Is it easy? Is COD available? - → Check shipping cost: Hidden costs kill conversions - → Add trust signals: Reviews, "genuine product" badge, return policy - → Try a better offer: Free shipping, discount, bundle

Not getting clicks on ads? - → Improve ad creative: Test a Reel or lifestyle image - → Make the offer more compelling in the ad copy - → Check targeting: Too narrow? Too irrelevant? - → Test a different hero product

High CPM (expensive impressions)? - → Broaden your targeting - → Try different placements (Reels tend to be cheaper) - → Improve ad quality score with higher-engagement creatives

CPA (cost per sale) too high? - → Focus on higher-AOV products or create bundles - → Tighten retargeting window to 3-7 days - → Pause all underperforming ad sets

Step 10: Zero-Budget & Low-Cost Tactics

Complement your paid ads with these free strategies:

Organic Instagram (Free)

- Post 4–5 times per week: product shots, styling tips, behind-the-scenes
- Create Reels — they get 3–5x more reach than static posts
- Use 20–25 relevant hashtags per post
- Engage daily: Comment on potential customers' posts

WhatsApp Marketing (Free / Low-Cost)

- Add WhatsApp button to threadzu.in
- Create broadcast list of past customers
- Send new arrival and exclusive offers
- Use WhatsApp Business catalog feature

Influencer Barter (Product Cost Only)

- Find 3–5 micro-influencers (1K–10K followers) in fashion/lifestyle
- Offer free products in exchange for content (Reels + Stories)
- Repurpose their content as ad creative (with permission)

Email Marketing (Free)

- Add email popup: "Get 10% off your first order"
- Set up 3-email abandoned cart sequence
- Send weekly newsletter with new arrivals and offers

SEO (Free, Long-Term)

- Optimize product titles for search: "Buy [product type] online India"
 - Write category page descriptions
 - Start a blog with styling tips and lookbooks
-

Step 11: Common Mistakes to Avoid

✗ Mistake	💡 Do This Instead
Splitting ₹5K across 5 campaigns	Focus on 1-2 campaigns max
Changing ads every day	Wait 5 days / 50+ clicks before judging
Targeting too narrow	Start broad, let algorithm optimize
Sending traffic to homepage	Send to the specific product page
No retargeting	Set up retargeting from Week 2
Ignoring product page quality	Optimize your page first
No urgency or offer	Always have a compelling reason to buy now
Only boosting Instagram posts	Use Ads Manager for real campaigns
Not having COD	COD is expected for new Indian D2C brands

Step 12: ROAS Projections & Targets

Fashion / Apparel Benchmarks (India)

Metric	Average	Good	Great
ROAS	2-3x	4-5x	6x+
CTR (Click-Through Rate)	1-2%	2-3%	3%+
Conversion Rate	1-2%	2-3%	3%+
CPC (Cost Per Click)	₹5-15	₹3-8	<₹5
CPM (Cost Per 1000 Views)	₹100-300	₹50-150	<₹80

Your Monthly Projection Calculator

Fill in your numbers:

Monthly Ad Budget: ₹ _____
 Target ROAS: _____ x
 Expected Revenue: ₹ _____ (Budget × ROAS)
 Average Order Value: ₹ _____
 Expected Orders: _____ (Revenue ÷ AOV)
 Target CPA: ₹ _____ (Budget ÷ Orders)

Example with ₹5,000 budget and 3x ROAS target:

Monthly Ad Budget: ₹5,000
 Target ROAS: 3x
 Expected Revenue: ₹15,000
 Average Order Value: ₹800
 Expected Orders: ~19 orders
 Target CPA: ₹263 per order

Quick-Start Summary

Step	Action	Timeline
1	Complete pre-launch checklist	Day 1
2	Calculate breakeven ROAS	Day 1
3	Pick 1-3 hero products	Day 1
4	Create 3 ad creatives	Day 2-3
5	Launch Meta prospecting campaign	Day 3
6	Wait 5 days, review results	Day 3-8
7	Optimize + start retargeting	Week 2
8	Scale winners, kill losers	Week 3-4
9	Add organic + WhatsApp tactics	Ongoing
10	Review and plan Month 2	End of Month 1

How to Convert This Guide to PDF

Use any of these methods:

1. **VS Code:** Install "Markdown PDF" extension → Right-click → "Markdown PDF: Export (pdf)"
2. **Online:** Paste into markdownpdf.com
3. **Chrome:** Open this file in a Markdown viewer → Print → Save as PDF
4. **Pandoc (CLI):** `pandoc threadzu-ads-strategy-guide.md -o threadzu-ads-strategy-guide.pdf`
